

WINTER 2020
ECOLOGY AND EVOLUTION SEMINAR
THURSDAY, 4 PM, Grove 1309

PBG 292 – CRN 67837

ECL 296 – CRN 52894

Date	Speaker & Title	Institution	Host
9 January	Ted Grosholz <i>Moran Effects, Hydra Effects and Overcompensation: the Theory and Practice of Managing Marine Invasions</i>	UCD	Erik Grijalva
16 January	Euan Richie <i>A global perspective on predator ecology and management in human-dominated ecosystems</i>	Deakin Univ., Aus.	Justine Smith
23 January	Margaret Palmer <i>Sustainable restoration of aquatic ecosystems: the search for a process-based understanding</i>	Univ. Maryland	Alan Hastings
30 January	Aurora Ricart <i>The influence of seagrass meadows on the seawater carbonate system and its ecological implications</i>	Bodega Marine Lab	Tallulah Winqvist
6 February	Robert Fletcher <i>Connecting nature: the problem of movement and connectivity in the Anthropocene</i>	Univ. Florida	Allison Ke
13 February	Jeff Good <i>The evolution of seasonal camouflage</i>	Univ. Montana	Sivan Yair
20 February	Sandra Rehan <i>Behavioral genetics and social evolution of the small carpenter bees</i>	York Univ., Can	Nick Saleh
27 February	Karen Abbott <i>When and where can we expect to see early warning signals in multi-species systems approaching tipping points?</i>	Case Western Univ.	Alan Hastings
5 March	Eric Sanford <i>Ecological and evolutionary dynamics of poleward shifts in geographic ranges</i>	UCD	Sam Walkes
12 March	Michael Shapiro <i>Fancy features and a checkered past: genetics of diversity in the rock pigeon</i>	University of Utah	Erin Calfee
